Summary

Portfolio : Portfolio/zeelkher

I am a Web Developer skilled in HTML, CSS, JavaScript, PHP, MySQL, and Bootstrap. I develop responsive, user-friendly websites and connect them with databases using phpMyAdmin and SQLite. I focus on building clean, functional, and reliable web applications that provide a smooth user experience.

Projects

Github : github.com/zeelkher

Doctor Appointment Management System - php

- *Designed and developed a dynamic doctor appointment system using PHP and phpMyAdmin. The system allows patients to register and book appointments with doctors, while doctors can view their schedules. Admins can manage doctor and patient records, appointment status. The backend logic handles validations, conflict-free bookings, and CRUD operations efficiently.*

CaptureCrew – Asp.net core

- *Built a full-featured photographer booking platform using **ASP.NET Core MVC** and **MySQL**. The system supports user registration, profile browsing, and service filtering by location and category. Photographers can manage their listings, images, and availability through a secure backend dashboard. The platform includes booking management, dynamic content rendering, and a mobile-responsive interface — designed to simplify the booking experience for both clients and photographers.*

WiFi QR Code Generator – HTML, CSS, JavaScript

- *Developed a lightweight web application that generates a scannable WiFi QR code by simply entering the network name and password. Users can download the QR code as an image or PDF for easy sharing or printing. This tool simplifies WiFi access by eliminating the need to manually enter login credentials.*

Bachelor of Science in Information Technology

Uka Tarsadia University

2025

Certifications

- Effective Leadership – HP Life (Nov 2024)
- Agile Project Management – HP Life (Oct 2024)
- Python Fundamentals – Great Learning Academy

Technical Skills

- Development: HTML, CSS, JavaScript, PHP, MySQL
- Basic Programming: C, C++, Java, Data Structures, OOP
- Platforms : DB Browser, VS Code, XAMPP

Languages

- English, Hindi, Gujarati
